

1.Product Overview

This product is an efficient and stable switching power supply adapter, designed to convert 220V AC mains electricity to DC power. It is suitable for providing safe and reliable DC power to LED strips/lights, network equipment, security cameras, audio systems, routers, toy models, and other electronic devices compatible with the specification.

2.Important Safety Warnings

This product is designed for dry indoor use only. Do not use in damp, dusty, splash-prone, or high-temperature environments (e.g., bathrooms, near kitchen stoves).

Place the adapter in a well-ventilated area during use. Do not cover it with clothes, paper, etc., to prevent overheating.

High-voltage components inside. Do not disassemble, impact, or attempt to repair this product in any way to prevent electric shock or damage.

When connecting or disconnecting, always hold the plug itself. Do not pull on the power cord. Ensure all connections are secure.
